SUMMARY

AI Engineer with experience building computer vision applications, semantic search systems, and real-time web platforms using Python, FastAPI, and React. Worked on projects involving retrieval pipelines, traffic monitoring, backend APIs, and data processing systems. Interested in building practical software systems using machine learning and backend systems.

EXPERIENCE

C# .NET Developer Trainee

Cognizant

04/2026 • Vadodara, Gujarat • Global IT services company

- Developed backend modules, RESTful service layers, and relational database solutions using C#, .NET Framework, and SQL Server while applying OOP principles, structured debugging, unit testing, and SDLC best practices within enterprise development workflows.
- Collaborated in Agile sprint cycles including standups, sprint planning, retrospectives, and code reviews using Git-based version control; gained exposure to enterprise patterns, deployment automation, through backend utility development.

PROJECTS

UrbanFlowAI

Traffic Management System

20/05/2026 – 23/05/2026

- Led development of a traffic monitoring platform using YOLOv8 and OpenCV for vehicle tracking and congestion analysis.
- Delivered backend services, database systems, and frontend dashboard for junction monitoring and traffic signal management.
- Added emergency route handling and multi-junction tracking using FastAPI, React, PostgreSQL, and WebSockets.

RepoIR

Semantic Knowledge Search Platform

08/2025 – 12/2025

- Built a document retrieval system FAISS and SQLite FTS5 with sOCR ingestion pipeline (Tesseract) cut manual indexing by 70%; 3x FAISS throughput improvement over baseline.
- Created 8+ RESTful APIs with JWT authentication & AES-128 encryption; implemented encrypted cloud sync workflow for secure end-to-end document storage and retrieval.

A.R.Y.A

Cisco Hackathon

10/2025 • Virtual • A hackathon organised by Cisco

- Worked on NLP-based document summarization pipeline that reduced manual review time by 60%; delivered fully functional prototype within a 24-hour agile sprint with a 3-member team using Git workflows.
- Ranked 1st in the Cisco Challenge Track and secured a position among the top 12 teams overall out of 150+ national-level participants.

EDUCATION

B. Tech COMPUTER SCIENCE AND ENGINEERING – ARTIFICIAL INTELLIGENCE, Parul University, Vadodara | 2023–2027

CERTIFICATIONS

AWS Academy Cloud Foundations & AWS Cloud Practitioner Essentials

Amazon Web Services

IBM AI Fundamentals

Cisco Networking Academy

Hashgraph Developer Course

The Hashgraph Association

Software Engineering Intern

HackerRank

Green Skills & AI

Parul University - edunet

KEY ACHIEVEMENTS

1st Place – Cisco Challenge Track (A.R.Y.A)

Ranked 1st in Cisco Challenge Track; top 12 among 150+ national teams for delivering an NLP-powered automation prototype in a 24-hour Agile sprint.

Silver Medalist – Summer School

Research Paper

Recognized for technical contribution and collaborative innovation in an academic publication.

Finalist – AI Finance Hackathon, IIT

Kanpur

Top 10 finalist at Techkriti 2025 for developing a predictive analytics system for financial market.

Top Performer – Deviathon Hackathon

Built a blockchain-enabled fintech platform integrated with intelligent workflow automation.

DSA / Problem Solving

Solved 400+ LeetCode problems, earned 2★ on [CodeChef](#), and achieved 5★ ratings in Python and Java on [HackerRank](#).

SKILLS

Languages: Python, Java, C# (.NET), JavaScript

Frontend Development: React.js, JavaScript, HTML, CSS, Component-Based UI Development

Backend Development: Python, Django, FastAPI, Node.js, RESTful APIs, API Integration

Databases & Search: SQL, FAISS, MongoDB, MySQL, PostgreSQL

AI / ML: OpenCV, YOLOv8, Scikit-learn, XGBoost, Pandas, NumPy, Embeddings, RAG Pipelines

Tools & Platforms: Git, GitHub, VS Code, Linux, Jupyter Notebook, Google Colab, AWS

Software Engineering: Agile/Scrum, SDLC, Debugging, Unit Testing, OOP, Version Control

Soft Skills: Collaboration, Leadership, Technical Documentation, Problem Solving, Rapid Learning
